

What is Nufree?

Nufree is the gold standard in hair removal and is carried by thousands of professional salons throughout the world. It was developed over 25 years ago to help plastic surgeons remove hair from a patient before surgery. Here are just a few of the reasons why Nufree is the most effective hair removal treatment in the world.

- Nufree is **NOT A WAX** and never sticks to the skin.
- Nufree is **self-preserving antibacterial/ antimicrobial** so its **safe, clean and germ free**.
- Nufree is completely **BOTANICAL** and safe for the entire body.
- Nufree doesn't dry and can be erased any time!
- Nufree is **scientifically tested** and uses **no animal products**.

Accept no substitutions... there is only one Nufree Nudesse, non-wax hair removal process!

What is finipil®?

Scientifically approved, patented lotion made by Equibal Labs, is for application immediately after Nufree Nudiesse hair removal treatments and in between treatments.

The many uses for finipil...

Whether or not you are bundling up for winter warmth, or stripping down for warmer climates. You need finipil along for the ride!

Airports? Taking off those shoes? Going to the health club, beach, or resort activities? Finipil is antibacterial and antimicrobial!!

Flying? Wearing new boots? Feet swelling? Finipil reduces swelling and cools instantly!

Can't bare chapped lips and hands? Finipil relieves instantly and continues to protect.

For added moisture and protection use finipil under [Hands N' Heels Glove®](#). And say goodbye to chaffing, dryness, paper cuts and soreness.

FINIPIL CAN BE FOUND ONLY IN SELECT SALONS!

Frequently Asked Questions

If Nufree isn't a wax, what is it? Nufree is a natural, self-preserving antibacterial/antimicrobial, anhydrous botanical formula. It contains no wax, no sugar and no honey.

2) How long has Nufree been in existence?

Nufree has been used in thousands of salons for over 30 years.

3) How safe is Nufree? Nufree was originally formulated for plastic surgeons who required hair removal for their patients prior to surgery. Nufree was scientifically tested for over 10 years.

4) Why is there no pain with Nufree? Nufree never dries and doesn't stick to the skin, so it doesn't pull or cause painful irritation.

5) How long does a treatment take? The average session is between 5-10 minutes. For example, eyebrows, sideburns, upper lips or one arm can be treated in 5 minutes. A full pair of arms, tummy, bikini line or underarms can be treated in just 10 minutes. A pair of legs only takes 20 minutes.

6) How much does it cost? That will vary slightly by salon, but chances are it will cost you less than you are spending on disposable razors. Some parts of the body can be treated for less than \$20.

7) Why do I need finipil after my treatments? finipil helps shrink the empty follicle, keeps it clean and retards hair re-growth.

8) How long do the results last? Results can be seen immediately. After your first two treatments, regrowth is lighter and softer. If finipil is applied, you will initially return in four to six weeks. With each additional treatment where finipil has been applied, you will experience one third less growth each time and visits will not be required for six to ten weeks. Eventually you only need to return for treatments once to twice a year.

9) Why can't I do it myself? Deep hair removal is not a home treatment. Amazing long-term results are achieved because the process is performed by a trained professional. finipil helps perpetuate the results achieved through your Nufree treatment.

10) Does it matter what applicators are used?

All Registered Nufree Professional Salons **MUST** use sanitary disposable applicators or medical grade stainless applicators that can be cleaned. If you have received this treatment with any other applicator please call 1 (800) 247-2405 to report the salon.
